Vision

The Seed /sēd/

Make Toronto the leader in food education.

Mission

The Seed believes in the power of food to bring people together.

Through experiential learning in its state of the art facilities, The Seed will enable people of all ages and backgrounds to connect with each other through food.

The Seed will create an identity for the neighborhood and the city by celebrating Toronto's diversity and role in the food industry.

The Seed will serve as a trailblazing institution in the field, drawing in scholars, policymakers, concerned stakeholders, community members, and future food leaders. The Seed is a place to connect, educate and create - within and outside its walls.
